MaMa Marine software: Powering Collaboration for Circular Economy

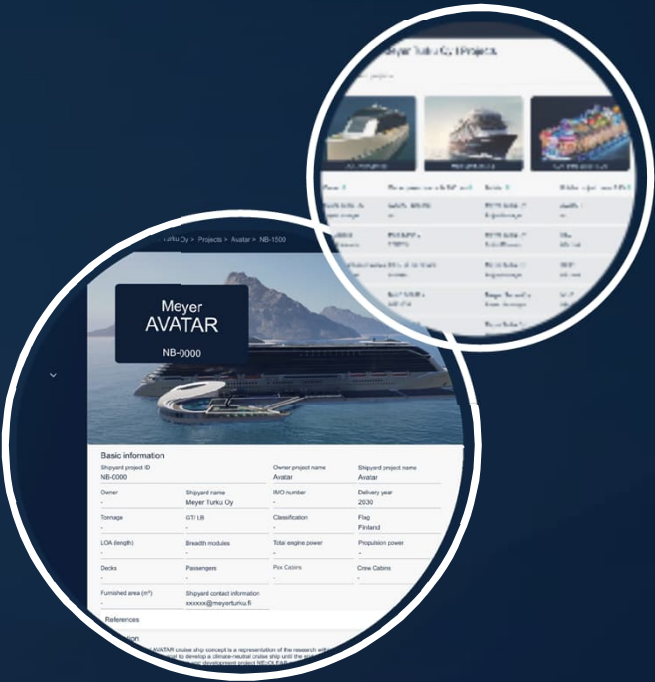

MaMa Marine is an innovative software solution designed to streamline the management of cruise ship interior materials throughout their lifecycle.

Software is focused on interior materials used in cruise ship architecture, addressing both current and future needs in design, construction, operation, and data management.

COLLABORATION:
MaMa SOFTWARE IS CREATED
FOR THE WHOLE ECOSYSTEM
TO ENCHANCE NEW AND
EXISTING PROCESSES

The image shows the login interface for MaMa Marine lifecycle management software. It features the MaMa logo with a registered trademark symbol, the text 'Marine lifecycle management software', and three input fields: 'Enter your email*', 'Enter password*', and a teal 'Login' button.

Two circular callouts show screenshots of the software interface. The top callout shows a project overview for 'Meyer Turku Oy Projects' with three ship images. The bottom callout shows a detailed view for 'Meyer AVATAR NB-0000' with a table of basic information.

Basic information			
Shipyards project ID	Owner project name	Shipyards project name	
NB-0000	Avatar	Avatar	
Owner	Shipyard name	IMO number	Delivery year
Meyer Turku Oy			2020
Tonnage	GRT IIR	Classification	Flag
			Finland
LOA length	Breadth modules	Main engine power	Propulsion power
Decks	Passengers	Pix Cabins	Crew Cabins
Furnished area (m²)	Shipyards contact information		
	mexico@meyerturku.fi

With a structured, visual approach, cloud-based MaMa Marine software allows for efficient tracking and organization of information and processes across cruise ship projects and areas. MaMa enables seamless collaboration among all stakeholders, including shipyard, architects, turnkey companies, suppliers, and cruise line companies.

“With MaMa Marine software, we can track and analyze products throughout their entire life cycle—from initial ship concept to the end of a product’s useful life—empowering cruise ship owners and our whole ecosystem in transition towards circular economy.”
