Evolution meets reliability

FRANKE
SWISS MADE

New A600

Premium All-rounder

Built for mid- to high-volume environments, the new A600 delivers barista-quality beverages with ease and consistency.

Its compact, modular design offers a wide range of drinks for both served and self-service operations, while intelligent features simplify workflows and ensure premium in-cup quality at the touch of a button.

FrankeConnect
Built-in connectivity

Performance Specialist

Designed for high-demand venues, the new A800 combines speed, precision and consistency with parallel dispensing and ease of use to keep coffee service running smoothly.

With flexible configurations and smart features, it delivers maximum output with minimal pressure – any time of day. All while ensuring every cup meets the highest quality standards.

New A800

New A Line – Value Driver

Premium In-Cup-Quality

Industry-leading mixing temperature and best-in-class in-cup-quality. The New FoamMaster delivers authentic barista-grade foam while preserving natural taste and texture. iQFlow™ ensures exceptional consistency, with over 95% of extractions within ±1 second of preset brew time – now standard across all New A Line machines.

New A Line – Value Driver

Sustainability

Advanced boiler insulation and an improved cleaning system cut resource use and energy loss by up to 44%. Durable metal components replace select plastics, boosting recyclability. FrankeOS keeps machines updated without technicians or disruptions. Upgraded milk systems significantly reduce milk waste and support alternative milk options without cross-contamination. This allows the New A Line to meet the needs of people with specific dietary requirements—whether due to health, cultural or ethical reasons.

New A Line – Value Driver

Future Proof

Coffee making is becoming increasingly digital, and clarity is essential for success. As programs grow in scale and complexity, FrankeOS delivers intuitive guidance, seamless updates, and connectivity via FrankeConnect and FrankeCloud. This ensures smooth operations and consistent performance across locations.

New A Line – Value Driver

Flexibility and Variety

Flexibility and variety are essential for modern coffee solutions. Our modular approach perfectly adapts to customers' needs by offering up to three grinders and two powders in a compact footprint. Everything is managed through an intuitive user interface for effortless control and customization.

New A Line – Value Driver

TCO savings

Reducing the total cost of ownership is key. HeatGuard lowers energy loss, IndividualClean cuts detergent use, and the New FoamMaster minimizes milk waste while maintaining perfect texture and taste. This helps to save resources and costs.

Ease-of-use & Design

Effortless operation meets durability in this elegant design. Powder-coated metal sheets in three elegant colors give the machine a premium aesthetic and long-lasting strength. Intuitive workflows and a user-friendly interface simplify daily tasks , ensuring a smooth experience from setup to service.
